Family Representatives*

FAST
FACT

Handwashing is one of
the most important ways
to prevent the spread of
infections including the
common cold, flu and
hard to treat infections

**IT IS EVERYONE'S
RESPONSIBILITY TO BREAK THE
CHAIN OF INFECTION...**

Hand Sanitizers

Using soap and water is the preferred method for washing your hands. It cleans and sanitizes your hands. However, if you cannot get to a sink...

HAND SANITIZERS

- Are good only if your hands have no visible dirt or grime on them
- Work because of the high alcohol content
- Do not replace washing your hands
- Are for quick cleaning only

HOW TO USE HAND SANITIZERS:

1. Use a nickel-sized amount of sanitizer
2. Thoroughly rub hands together
3. Continue to rub until dry

A NOTE ABOUT ALCOHOL BASED HAND RUBS

- They are products that kill germs on the hands
- Are fast acting and convenient

How to Wash Your Hands

1 Remove jewellery

2 Turn on water, making sure it is warm

3 Wet your hands and apply soap

4 Rub hands together for 20 seconds (time to sing happy birthday twice) paying attention to your fingers; fingernails and areas between your fingers

5 Rinse your hands from wrists to fingertips keeping fingers pointed down

6 Dry your hands with a paper towel

**FAST
FACT**

Remember It only takes 20 seconds to protect yourself and others

7 Use paper towel to turn off the faucet and open bathroom door
